

Feature Key (Paytimer)

With DGI 10 comes the introduction of feature keys. A System Feature Key will replace the current Paytimer option installed on the Milltronics machines. A Feature Key can still be generated for a specific end date or be permanently enabled.

Machines ordered as of IMTS 2018 with the 9000 control or machines ordered with an 8200B control who purchase the windows upgrade will receive DGI 10. software.

Below are the instructions to obtain the new Feature Key (Paytimer).

To Obtain Feature Keys

1. Export the Feature Keys request file.
 - a. Insert a USB thumb drive into the machine. It's best to have just one thumb drive inserted for this operation.
 - b. From the Main DGI Desktop window, press F10-Utility.
 - c. Press F10-Features.
 - d. Press F1-Request. Note the location to which the Feature Keys request file (file extension .fke) was written.
2. Obtain the Feature Keys file.
 - a. E-mail the Feature Keys request file created in 1d. above to paytimer@milltronics.com. **Please include: The customer name and machine serial number.**
 - b. A response containing your Feature Key(s) (file extension .fki) will be sent to you by return e-mail. Save this file to a USB thumb drive.
3. Import the Feature Key file into DGI.
 - a. Insert the USB thumb drive containing the Feature Keys file into the machine. It's best to have just one thumb drive inserted for this operation.
 - b. From the Main DGI window, press F10-Utility.
 - c. Press F10-Features.
 - d. Press F5-Import. The expiration times for the feature will be updated.
